

New Product Announcement

GPS Antennas • Carrying Cases • Tracking & Monitoring Solutions • Mapping Tools & Software

The GPS Leash's retractable lanyard is your lifeline to GPS and valuable gear.

The GPS Leash™ is a retractable lanyard that provides quick, secure access to your valuable personal electronics. Unlike ordinary belt clips and

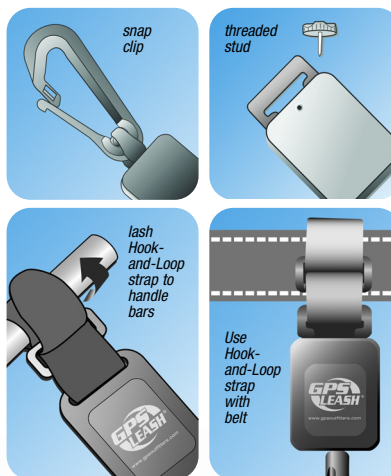

carrying cases, the GPS Leash™ tethers your GPS to your clothes, pack or vehicle to prevent loss or damage. The Leash is always at the ready

to “catch and snap” your GPS back into place should it be knocked out of your hand by an unexpected wave or loose foothold.

UNIVERSAL ATTACHMENT KIT

Allows easy, secure connection to packs, belts, clothes, rails—ideal for any application.

The GPS Leash is an excellent single-SKU solution that includes all the most popular attachment styles in a single pak— it works with your current GPS selection, older GPS models, and a host of other portable electronics like radios, cameras, and phones.

USE IT WITH EXISTING BELT CLIP

The GPS Leash™ is an essential companion to ordinary belt clips for important safety devices like GPS, radios and the SPOT Satellite Messenger. Don't take a chance. A single bump can send your GPS off a cliff or into the drink— you may not realize it until it's too late.

QUICK CONNECT (Q/C) FEATURE

Exclusive Q/C design allows easy connection and removal of your GPS to the retractor. Includes 8" and 3" universal lanyards.
